

AUTOMATE TESTING

ACADIS TESTING

In complex, high-risk situations, your team has fractions of a second to make life or death decisions.

That's why traditional pen-and-paper assessments fall so short of providing an accurate gauge of your true readiness for those moments. And it's why Acadis Testing has become such a prized resource for training professionals who demand a more complete perspective of their team's capabilities.

Acadis Testing puts the information you need right where you need it. It gives you a complete view of students' test scores, range skills, physical fitness levels and adherence to proper procedures.

Acadis Mobile allows you to easily record observed tests and practical exercises right to your mobile device, making pen and paper record keeping a thing of the past.

So with a quick review, you'll know who's ready to meet the challenges of the job (and, perhaps more importantly, who's not). And since Acadis Testing is fully integrated with the rest of the Acadis Readiness Suite, you won't need to invest time, energy or resources in a costly standalone system or dual data entry.

KEY BENEFITS

Save Time: Define testing rules and rely on templates to quickly develop new tests, securely add or update test questions, and administer tests online

Stay on Target: Develop learning objectives for effective testing practices that ensure your class curricula are aligned to training goals — and that your training goals are aligned with your organizational directives

Support Accreditation: Match learning objectives to class curricula to ensure adherence to key accreditation standards

Measure Everything – Track written, online or observed tests (including physical skills assessments) and transfer them automatically to personal records

Optimize Evaluation: Benefit from initial test, make-up and re-take versioning, and use statistical analysis of classes, exams or questions to improve future testing and curricula

Ensure Integrity: Capitalize on randomization features that ensure no two tests administered present the same questions in the same fashion

"The Office of Training and Development (OTD) is employing this software [Acadis Testing Module] as the standard by which all online testing will be conducted for Customs and Border Protection (CBP) training. This new system will have an immediate impact in reduced costs, better efficiency, and greater effectiveness across all CBP field component academies . . ."

– U.S. Border Patrol Academy

ACADIS TESTING

FEATURE COMPARISON

Unlike generic systems from competitors, the Acadis® Readiness Suite was built from the ground up to meet the unique needs of law enforcement, public safety and military communities. So we invite you to take a closer look at everything it has to offer. When you do, you'll find that Acadis Readiness Solutions compare very favorably across the board. Because feature-for-feature, benefit-by-benefit, only Acadis delivers a truly comprehensive set of tools that give users the confidence to know that their personnel and resources are ready for whatever awaits.

● Comparable ● Partial ○ Limited

FEATURE	ACADIS	GENERIC
Learning item bank with question repository	●	●
Multiple question types: true/false, yes/no, multiple choice and multimedia questions	●	●
Randomize test questions	●	●
Integrated learning objectives repository	●	○
Simple test setup wizard	●	○
Easily embed written, practical and observed tests into curricula	●	
Track exam and question versions	●	○
Compare question validity statistics by class, student groups and historical question use	●	○
Easily combine exams across types (observed, practical and timed) into multi-part exams.	●	
Flexible custom grading scales (timed tests, point ranges and pass/fail checklists)	●	
Reusable test templates - link tests to curriculum	●	
Easily import existing questions from CSV and/or Microsoft Excel®	●	○
Append test results directly to student record	●	
Create retests (option to exclude or include questions from the initial test)	●	
Online testing portal with "save-as-you-go" and timed test features	●	
Full integration with Acadis Training and Performance	●	
High-security system framework (FISMA & DHS 4300 compliant)	●	
Record observed tests directly to a tablet or mobile device	●	
Test scores may be recorded offline and uploaded when a data connection is available	●
